

Help Howard County keep its freshwater fresh:

# Be Salt Wise!

*Excessive salt application prematurely ages vehicles, roads, and bridges and degrades our freshwater streams and drinking water. Don't salt before the storm & follow the 4 S's:*

Remove snow and scrape away ice

Space salt granules about 3" apart

*One 12 oz. coffee mug of salt treats 10 sidewalk squares*

Use sand if temps fall below 15\* F

After the storm, sweep up remaining granules for reuse
